

# Medical Emergency and Resuscitation Training

# Regulations

IACSD standards for Conscious Sedation in the Provision of Dental Care 2015 who state:

“Practitioners must be able to provide age-appropriate immediate life support as defined by the main elements of the Resuscitation Council (UK) ILS and PILS training programmes.

**It is not essential to undertake a Resuscitation Council (UK) accredited ILS/PILS course.**

Alternative courses with equivalent content which are adapted to the needs of dental practice are acceptable: these might also include the management of common sedation, medical and dental emergencies.”

# Training Providers

- Ensure that the course provider covers the equivalent content of an ILS
  - Medical Emergencies scenarios are a good way to learn
- **AGE APPROPRIATE** – if treating children there should be child based scenarios
- Basic Life Support is not enough for Conscious Sedation practitioners

# www.cprforlife.co.uk

- Level 1 and Level 2 Basic Life Support and Medical Emergency Training
- **Level 3 Dental Immediate Emergency Life Support for Conscious Sedation**
- Trainers are highly trained resuscitation practitioners who are either Doctors, NHS Resuscitation Officers, Advanced Nurse Practitioners and Paramedics.
- We ensure every healthcare professional training course complies with current **Resuscitation Council (UK) Guidelines**
- **ALIGNS TO THE UK Core Skills Training Framework (CSTF) for Mandatory Resuscitation training.**
- **The Level 3 course complies with the IACSD Standards for Resuscitation Training in Conscious Sedation Patients 2015.**
